Summary

Adaptable and motivated third-year Software Engineering student, recognized for analytical thinking, quick learning, and leadership abilities. Known for creative problem-solving and a commitment to delivering precise, innovative solutions, I thrive in team environments and bring strong organizational skills to every project.

Skills

C, Java, Python, MySQL, OOP, JDBC, Bash, Git

Education

Braude Academic College October 2021 – May 2026

B.Sc - Bachelor of Science, Software Engineering

GPA: 82.47

Studies Accomplishments:

Foundations of Computing Systems(100)

Operating Systems(90)

Algorithms(86)

Object Oriented Programming(82)

Projects

GoNature - Park Reservations and Operations System

- Collaborated in designing and implementing a park reservation system to streamline national park management, improving booking efficiency and operational workflows through backend logic and front-end integration.
- Developed a Java-based application in partnership with teammates, utilizing JavaFX and JDBC, and integrated server-client communication via OCSF.

Additional information

languages: Hebrew (native), English (good).
